ibml

One Infrastructure. Endless Benefits.

Harness the power of the ibml Fusion™

If you're currently using multiple machines to process incoming mail, then you're also spending a ton on real estate, labor, IT and maintenance. **Why settle for that?** There's now a way better way – one that allows you to modernize, downsize and eliminate excess costs.

See how the ibml Fusion streamlines your capture process to accelerate savings:

## The Old Way

Multiple Processes = **Multiple Headaches**

Most mailrooms today use multiple scanners to process large and small documents separately, slowing down the flow of information.

LIMITED SPEEDS
Slower speed due to manual handling

LABOR INTENSIVE
Tedious pre-sorting, batching, feeding and post-scan sorting

ERROR PRONE
High human error with low machine intelligence

COSTLY
More machines require more laborers, real estate, and maintenance

HIGH SECURITY RISK
Old OS systems run unprotected

COMPLIANCE LIABILITY
Poor auditability and user tracking

EXPOSURE RISK
Multiple operators and laborers per mailroom

The Fusion

All Your Documents **on One Infrastructure**

Leap to the future and consolidate all your document sizes into one intelligent system that eliminates need for manual sorting.

BLAZING FAST
Up to 714 letter-sized pages per minute

LABOR SAVING
Less operators needed with less machines

HIGH ACCURACY
In-line intelligence catches mistakes in real-time

COST EFFICIENT
Downsize and save on real estate, labor, IT and maintenance

CYBER SECURE
Upgradable, future-friendly software

SOCIAL DISTANCING FRIENDLY
Less staff = less risk

AUTOMATED AUDIT TRAILS
Easily track records and users

76% of scanning costs is spent on pre- and post-scan processes.[2]

41% of surveyed businesses cite security as the main benefit of centralized document processing.[3]

20% Faster Than Anything In It's Class
