

# COUNTER-INTELLIGENCE FOR YOUR CHAOTIC MAILROOM

ENEMIES ARE EVERYWHERE

**MISSED SIGNATURES**

**UNDETECTED BARCODES**

**PAPER JAMS**

**DAMAGED DOCUMENTS**

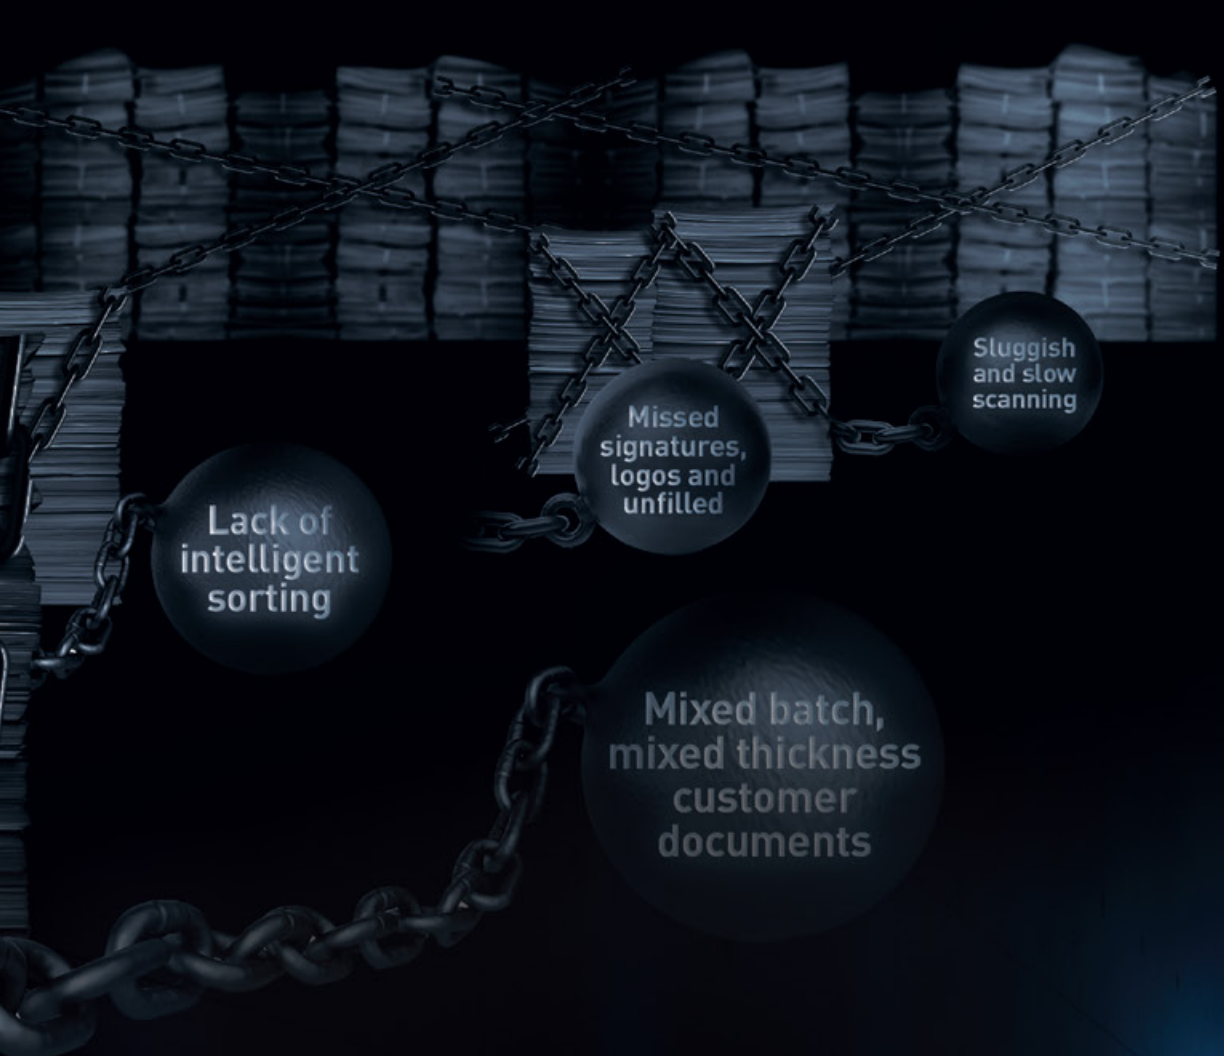

Neutralize all mailroom threats — seen or unseen — by capturing and methodically sorting your endless barrage of documents. Avoid self-sabotage by adding another brain to your operation.

**ibml**

**ibml ImageTracDS Scanner Series**

Lack of  
intelligent  
sorting

Missed  
signatures,  
logos and  
unfilled

Sluggish  
and slow  
scanning

Mixed batch,  
mixed thickness  
customer  
documents

## DON'T BE HELD CAPTIVE TO SIMPLE CAPTURE.

Most scanners just capture and save. **Why stop there?** Put a scanner to work that not only captures, but understands, analyzes, and makes real-time decisions. Converting important customer information at the point of image capture means serving customers faster.

## WHAT IS HANDLING COSTING YOU?

**75%** OF THE TOTAL COST  
OF SCANNING

is wasted on pre and post  
document sorting and handling.

**Too many resources. Too little return.** It doesn't have to be that way. Eliminate tedious sorting and handling. Simply feed and let the scanner do all of the reading, sorting, and analyzing for you.

# TAKE YOUR SORTING SPEED. ACCELERATE IT.

Gone are the days of slow, sluggish sorting — now replaced by the fastest throughput in its class. Equipped with two trays that painstaking precision to out-sort it all for you, ibml **ImageTracDS scanners** quickly set aside non-compliant documents, checks, and invoices with the push of a button.

## CAPTURE THE DETAILS, BEFORE ITS TOO LATE

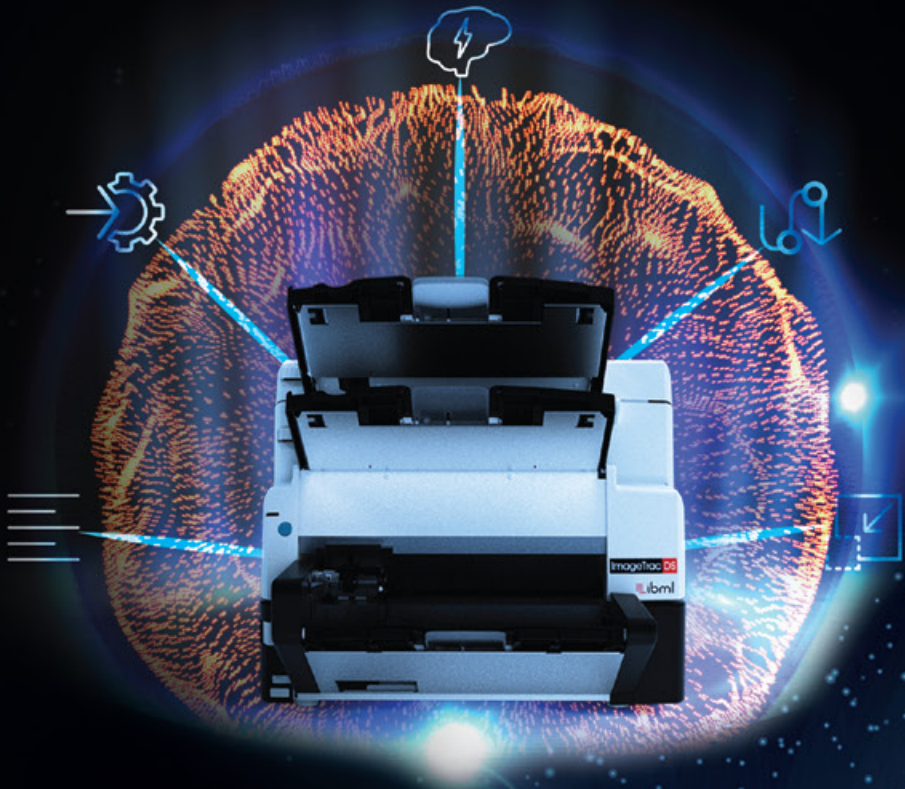

## How can you spot every detail with striking precision?

Threat detection of document defects fueled by:

Real-time intelligent decision-making

In-line document recognition

Critical content check

## SCAN THE RIGHT WAY WITH LEFT-JUSTIFIED FEEDING.

Aligning documents is at the center of your problems. Literally. Left-justified feeding means no more tape for small documents. Add a smart jogger that jostles all intermixed document types, so they feed with less prep. Then, items like checks and birth certificates pass through without paper jams. The payoff? Higher productivity. Lower stress.

## END THE INTEGRATION NIGHTMARE.

New technology? Fear not. Integration with open standards minimizes employee retraining. On the backend, effortlessly integrating capture solutions with industry standard TWAIN or ISIS drivers is a no-brainer.

## BOOST YOUR SCANNER BRAIN POWER.

Unlock even more capabilities such as automated document classification and intelligent extraction with ibml Capture Suite Software. It captures, understands, and sorts data. Then, diligently categorizes content based on logos, barcodes and patch codes — flawlessly — in real time.

## AUTOMATE YOUR AUDIT TRAIL.

From now on, compliance checks are uncomplicated. Intelligent in-line document recognition allows you to select printed matter based on document content. This helps create audit trails for your documents should you ever need them.

## SMALL FOOTPRINT. BIG IMPACT.

Multiply your throughput in even less space. ibml ImageTracDS scanners are easily transported to customer locations. That's the kind of compact counter-intelligence that wins mailroom battles.

# The Devil is in the Details.

## THE INTELLIGENCE IS IN KNOWING THEM.

### MENSA-LEVEL INTELLIGENCE

#### ibml ImageTracDS Scanner Features

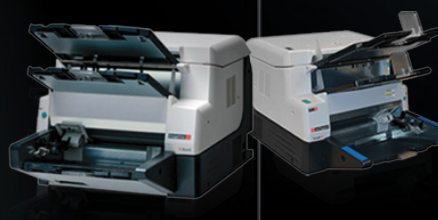

|   | DS1155           | DS1210           |
|---|------------------|------------------|
| RATED THROUGHPUT  | <155 DPM         | <210 DPM         |
| TWAIN & ISIS  | ✓                | ✓                |
| BASIC SORTING: SIZE,<br>BARCODE & PATCH CODE                          | ✓                | ✓                |
| INTELLIGENT SORTING:<br>CONTENT-BASED, LOGO,<br>OCR, OMR, HANDWRITING | UP TO<br>155 PPM | UP TO<br>210 PPM |
| INTELLIGENT PRINTING  | ✓                | ✓                |
| OPTIMAL LEFT-FEEDING<br>JUSTIFICATION                                 | ✓                | ✓                |

**Escape Your Mailroom Chaos.** When your scanner understands the document, you control the business. Set up a demo or get more details.
