Gain Control to Speed Ahead

See How ibml Cloud Capture Fuels Astonishing Agility

Triumph over market volatility. With full control over the entire document lifecycle, from capture to archival, you'll speed ahead with the market's only seamless flexible solution—ibml Cloud Capture.

ibml

Adapt.
Automate.
Accelerate.

Document processing is wholly unpredictable. At any time – you could have a sudden surge or a sudden drop – due to market shifts, new regulations, or peak demands. If you don't act quickly, this change in volume spins up hazards that can send your business out of control, leading to lost profits.

How can you overcome to defeat the enemy of surprise?

Take charge of your content and say goodbye to uncertainty. Capturing, processing and managing your data doesn't have to be complex—and it doesn't have to be purchased as separate solutions. Choose an integrated single platform that covers the entire lifecycle — from document capture to process automation to content management — while still adapting nimbly to the ever-changing cycles of your business.

Introducing ibml Cloud Capture (ICC)

Navigate the unpredictable with the market's first integrated cloud-native software platform that delivers unprecedented speed and control.

Powered for the Unpredictable.

ibmlCloudCapture

You Steer. You Accelerate.
We Adapt.

Three Solutions within One Unified Platform

Eliminate the need for multiple applications, integrations and configurations. Save time and money by utilizing one, unified platform for the document lifecycle – from document capture and information extraction to process automation to content management.

Get Up and Running in a short time

Avoid costly, lengthy integrations. Deploy rapidly with a ready-to-go solution designed to speed ROI.

Pay for Only What You Need

Other platforms are rigid, forcing you to pay a set price for features you don't even use. With ICC, you're free to add features anytime, giving you the freedom to evolve at your own pace.

Own Your Data, Always

Don't let anyone hold your data hostage. With ibml content services, own your data within your own content management repository on-prem or in your private or public cloud. If you decide to move on, you're free to take your data with you.

No Expertise Required

Harness sophisticated AI technology that learns from your power users without needing any IT user expertise. No need to code. No need to install software or buy server cores or deal with high upfront costs. Simply log in via any web browser.

Access Data Securely, from Anywhere

Centralize, process and access your documents securely from any location at any time.

Add Unlimited Users and Bots

Paying for more functionality is outdated. With ICC, there's no limit or fees for adding additional users or bots. Only pay for the document volumes you process.

Scale Up or Down in an Instant

Quickly adjust volumes to meet peak demands Add more processing power as you need—without waiting for infrastructure or licensing.

ibml

Cloud Hosted vs Cloud Native

Not all cloud platforms are the same. Only ICC offers a cloud native solution designed with the security and scalability built to perform for your business. Discover the differences.

All-in-One:

Capture   Process (RPA)   Manage

Lengthy deployments? Complicated integrations? Gone.

With a ready-to-go, seamless solution, every step is pre-integrated and user-friendly – meaning no technical expertise required. Streamline your entire document lifecycle from start to finish. Don't need every feature just yet? No worries. Turn on only what you need. Pay as you go and only for what you use. And, when you're ready to continue evolving, just turn on more features. It's that simple.

Cloud Hosted Cloud-Based

- Built on-prem and then moved to the cloud
- Difficult to scale
- Complicated to integrate
- Lengthy deployments
- Less secure, infrequent updates

Cloud Native

- Born in the cloud
- Built to scale instantaneously on-demand
- Quick, simple deployment
- Easily integrates with back-end systems
- Automatic, continuous security updates

Capture Services

Harness intelligent capture for any content from any source. Extract unstructured data with machine-learning technology. Upload content from anywhere and any device while tagging, processing and sending documents with both speed and accuracy.

- Intelligently Capture All Content
- Understand Content and Tag Automatically
- Learn Based on Tag History
- Leverage Existing Content Organization
- Empower Users to Manage and Onboard New Content

Robotic Process Automation

Easily create custom bots to automatically perform repetitive manual tasks. Add unlimited bots and users. Gain the ability to go back and review videos of finished tasks. Accelerate high-value, repeatable work—all with precise and efficient RPA technology.

- Automate Repetitive Tasks
- Integrate Systems
- Free Up Users Leverage Existing Interfaces
- Enable Process Standardization
- Limit Mistakes and Errors

Content Services

Manage any content on any repository. Find the documents you need when you need them. Centralize your documents on one platform. Scale volumes up or down—all while securely storing on compatible applications like Microsoft SharePoint.

- Find Content
- Store Securely
- Search and Access Easily
- Leverage Existing Investments
- Use Any Repository: MS Sharepoint, Azure, etc
- Integrate Quickly & Seamlessly
- User-Friendly Interface

ibml

Get Speed.
Gain Control.

Unify Your Entire Document Lifecycle with ibml Cloud Capture

There's a reason 80% of the world's largest mailrooms rely on ibml for mission-critical capture. Go with the experts. With ibml Cloud Capture, you're always in command. You own the data. You choose the features. And you determine your pace.
