# Harness the Power of ibml FUSiON

## To Dramatically Accelerate Your Mailroom

Overcome the outdated mailroom processes thwarting your productivity.  
Take charge and fuse your documents into a stream of powerful  
decision-making intelligence with the fastest, most agile scanner in the  
world – **the ibml FUSiON™**

# It's Time Your Mailroom Had a Change of Pace.

Tedious manual feeding...

Messy output stacking....

Multiple data repositories....

All the things that are holding you back from extracting your valuable information and accelerating it towards mission-critical decision-making.

**When will you be ready to hang up the outdated processes restraining your productivity?**

It's time to outpace the data evolution. Effectively merging your digital and physical worlds calls for more than just simple capture – it requires a deep understanding of the science behind truly intelligent, ultra-high-volume scanning.

## Introducing the new **ibml FUSiON™ Series**

With powerful new imaging technology and the world's fastest open-track feeding design, ibml FUSiON upends the game when it comes to processing documents, large and small, at breakneck speeds.

Discover  
the difference.

**The ibml  
FUSiON  
Scanner  
Series.**

Awe-inspiring Speed, Astonishing Results.

# Consolidate.

## Slash Operational Costs

Too many processes. Too little return. Shifting to one infrastructure for all of your capture needs allows you to radically reduce real estate, labor, and maintenance costs while pushing productivity forward. With an optimized feeder and new trailblazing speeds, you can now process hundreds of mixed-batch documents in record time for different core business applications. Unifying your infrastructure also helps with implementing standard operating processes that improve user training and productivity.

76%

of the total cost of scanning is spent on pre- and post-scanning process (Document Preparation and Document Sorting)

The Total Cost of Scanning: A Framework for Analysis and Improvement, ECM Connection

## Supercharge Your Sorting Intelligence

Discover post-scan bliss with advanced sorting capabilities. Faster, more intelligent sorting recognizes and classifies document types, shrinking your share of manual post-scan labor. When your scanner works smarter, you have more time to focus on decision-making.

# Accelerate.

## Fast-Track Your Feeding Process

Gone are the days of using different devices for different capture jobs: ibml FUSION handles them all. Left-justified and intermixed document feeding ensures every piece of information gets to its destination faster — **over 20% faster\***. Go further as accelerated throughput and the latest camera technology elevates you to the next level of efficiency.

\*When compared to speeds of competitive devices.

## Automate Your Auditing

Easily track and manage audit trails with no-fuss automation. A new document imprinter provides high quality document and barcode imprinting that ensures compliance. Plus, try out the new Eco mode to further reduce consumable imprinting costs.

## Detect Exceptions Earlier

Overcome unwanted pauses in your workflow with faster error recovery and automated exception handling. Spotting unfilled critical fields and incomplete documents in real time gives you the power to dramatically reduce customer turnaround times.

**Unfilled Critical Fields**  
**Missed Signatures**  
**Streaks**  
**Handwriting**

# Outperform.

## Dominate High Volumes

Easily scan and convert high volumes of documents with an unlimited daily duty cycle — without sacrificing speed and accuracy.

## Propel Productivity with Smarter Design

Enable easier installation, deployment, and improved service accessibility with a sleek, ergonomic body design. Intuitive feeder controls deliver a better operator experience — reducing training and increasing overall productivity. Plus, all new LED status indicators highlight where a stoppage has occurred.

## No Sweat Security

Protect your devices and your network. With legacy devices using older, unsupported operating systems, the risk of cybersecurity attacks is significantly higher. These days, hackers can infiltrate entire company networks and shut down operations simply by gaining access to one unsecured device. Fortunately, ibml FUSiON helps to protect your network against threats with the latest supporting OS, Veracode Level 4 certified, secure Capture Suite software, and role-based user-access controls.

# Top-Level Software, Service & Support

## Integrate Everything with Dynamic Software

Manage ever-increasing volumes of data by harmonizing your paper and digital worlds. With advanced recognition, classification, and extraction skills, ibml Capture Suite and Synergetics quickly analyze structured and unstructured documents for immediate downstream use, so you can take action sooner.

### The Intelligent Capture Suite Software Difference:

One document capture solution for multiple sources of business input

Lower total cost of ownership to achieve faster ROI

Centralized management and control of all scanners

Highest regulatory compliance and optimum data security

Accelerated delivery of information to downstream systems and processes

Can replace or complement legacy software

Improved visibility into operations

No click charges

### ibml Cloud Capture:

Triumph over market volatility. With full control over the entire document lifecycle, from capture to archival, you'll speed ahead and boost turnarounds with the market's only seamless, flexible platform.

### Three Solutions within One Flexible Platform

#### Pay as you go and only for what you use

##### Capture

- Any type, any source
- Extract with intelligent AI
- Understand and tag automatically

##### Process

- Automate repetitive tasks
- Get unlimited bots and users
- Enjoy high-speed accuracy

##### Manage

- Any content repository
- Leverage MS 365 and Sharepoint
- Search and store securely

## Unparalleled Service & Support

When you purchase an industry-best device, you're guaranteed not only to receive an exceptional solution, but the exceptional service and support needed to complement your brilliant decision.

Our experts are ready to work with you to tailor your device to your industry type, document needs, business specifications, and volume requirements to ensure your new ibml FUSiON is a perfect fit for your business.

# Model Comparisons

## CUSTOMIZABLE. SCALABLE. UNSTOPPABLE.

Use	Model	Min Frames (ppm)	Base Speed* (ppm)	Max Speed*	Pocket
Basic	ibml FUSiON™ 7200	2 (Max)	292	292	1
Standard	ibml FUSiON™ 7300	3	320	730	Up to 4
Versatile	ibml FUSiON™ 7400	4	320	730	Up to 15
Advanced	ibml FUSiON™ 7700	7	320	730	Up to 24

Check Speeds: 375 pm Min | 938 pm Max \*Speeds above are for A4 pages in Landscape mode.

### The ibml FUSiON™ Series

**ibml**  
**FUSiON™ 7200:**

Only looking to handle high volumes, with no need for complicated sorting? The 7200 is the perfect sweet spot scanner for BPO's and Shared Service Centers needing to convert large volumes of documents over multiple shifts.

**ibml**  
**FUSiON™ 7300:**

Looking for intelligence in your document capture? Expandable and upgradable, the 7300 is a great option for basic in-line processing and environments requiring reliable, intelligent batch processing.

**ibml**  
**FUSiON™ 7400:**

Do you encounter a wide range of workload types and volumes? If so, the 7400 is the perfect choice for environments requiring sophisticated transaction processing and robust in-line intelligence for rules-based processing, auto-batching, and auditing.

**ibml**  
**FUSiON™ 7700:**

Challenged by high volumes of intermixed documents that need sophisticated sorting and audit tracking? Choose the 7700 to reach the zenith of intelligence and post-scan capabilities.

# Fuse Your Processes. Fuel Your Productivity.

ibml FUSiON™ Streamlines Capture from Start to Finish.
