

The Fusion Process

Streamline Capture from Start to Finish.

How prepared are you?

If you think you've reached your productivity potential - think again. Outdated capture strategies and primitive legacy scanners hold you back from realizing your mailroom's ultimate performance threshold. Transform your mailroom into a powerhouse of speed and intellect with the new standard of ultra-high-volume efficiency: **the ibml FUSION HD™ Series.**

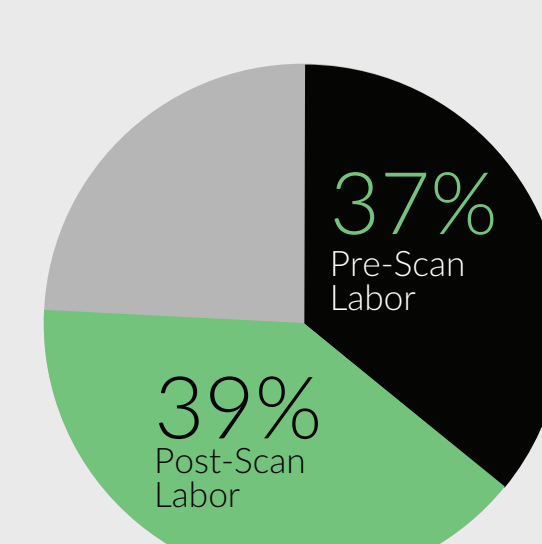

1

Consolidates to Accelerate

- Run** all your document types - big and small - together at high speeds and high volumes.
- Eliminate** tedious manual feeding.
- Remove** the need for multiple legacy capture devices.

76%

of the total cost of scanning is wasted on pre- and post-document sorting and handling.

2

20%

Faster Than Anything In It's Class

67%

Faster Than the Previous Model

Quicker Capture, Best Image Quality

Process more documents daily.

No more sluggish scanning. Capture critical information from documents faster using ibml's proprietary camera technology @600 DPI optical resolution to meet the strictest imaging standards like FADGI 3 Star.

3

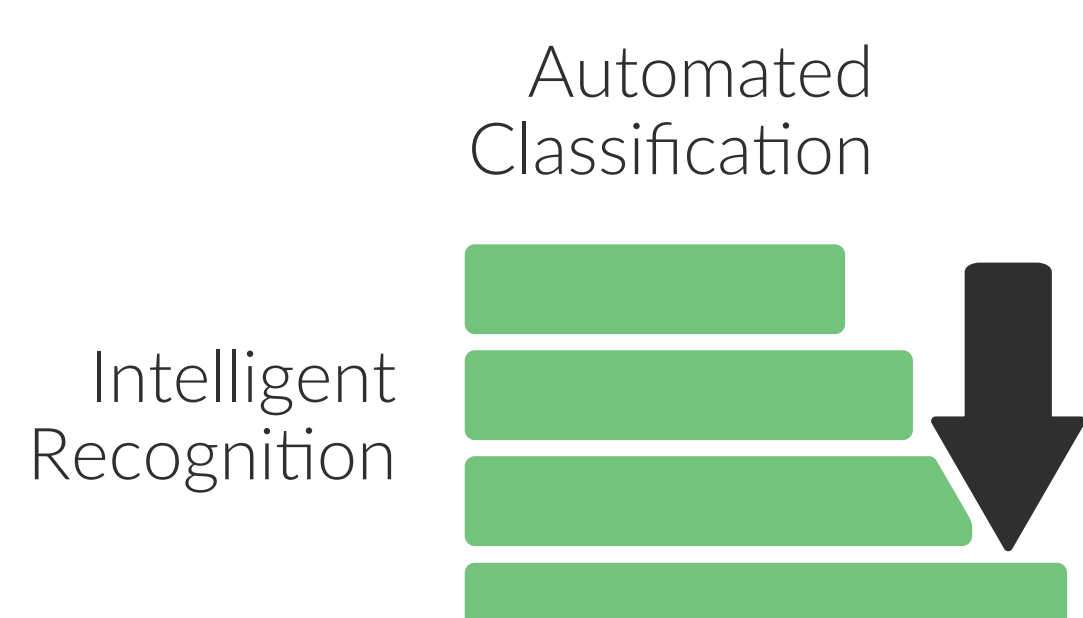

Exception-Exposing Technology

Vigilant software improves **exception handling** by flagging missing fields and signatures, speeding up customer turnaround times.

Unfilled Critical Fields
Missed Signatures
Streaks
Handwriting

4

Stunningly Smart Software

Sync extracted data to downstream systems faster with intelligent recognition and automated classification capabilities — **empowering you with quicker access to vital information.**

5

Automated Auditing, Air-Tight Security

High quality imprinting capabilities and automated audit trails ensure iron-clad adherence to security and compliance standards. **Now when you get requests for information, you're ready.**

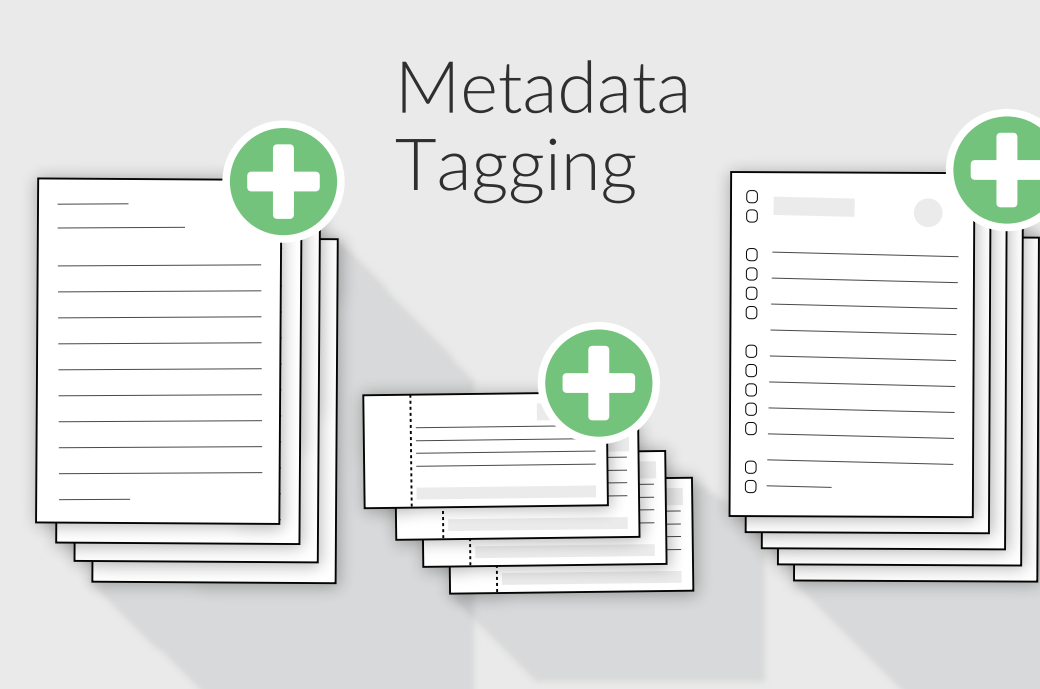

6

Up to 24 Customized Sorting Pockets

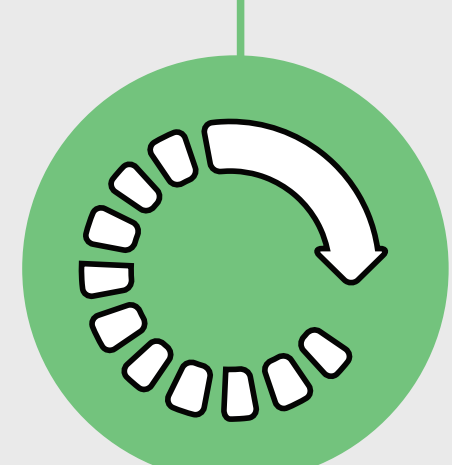

Supercharged Intelligent Sorting

Smarter sorting and automated pocketing settings allow you to minimize costly post-scan manual labor and keep crucial documents organized.

Neatly Stacked Documents & Mission-Critical Data Ready to Use.

Overhaul Your Performance Potential.

Consolidate

Reclaim budget that gets wasted on maintenance, real estate, and labor costs by consolidating to one omni-powerful infrastructure.

Accelerate

Redefine your productivity threshold with the ability to adapt, customize, and scale your device at will.

Outperform

Reach the next level of efficiency with a multitude of features that improve operator productivity and minimize equipment downtime.

**Fuse Your Processes.
Fuel Your Productivity.
Harness the Power
of the World's
Fastest Scanner.**
