

Speed Your Cash Flow Today with ibml

Accelerate your medical payment processing by outsourcing to ibml today. ibml helps providers receive, post, reconcile, and manage receivables and denials – both **electronic and paper-based**. Using ibml's outsourced services, you can drastically reduce upfront costs and speed your processing cycles while taking advantage of cutting-edge capture technology.

How It Works

Benefits

Get Started Fast

Choose from several different service options to create a customized solution

Reduce Manual Labor

Convert all elements of a healthcare transaction, including paper-based explanation of benefits (EOB) documents, and patient payments into a 835 electronic format

Increase Visibility with Online Portal

Search and view any 837 and 835 transactions and related information online

Speed Cash Flow

Get transactions delivered within moments to your billing or patient management system

Get 7 Years of Secure Data Storage

Fully HIPAA-compliant with complete audit trails and configurable controls

Easily Manage Special Handling Research

Denials, reconciliation, re-association and appeals are visible on the portal

Avoid Costly Capital Investments

Leverage state-of-the-art technology without purchasing

Streamline Your Healthcare Payment Processing Today
