

The IBM Coretex logo is positioned at the top left of the page. 'ibm' is in a white, lowercase, sans-serif font, while 'Coretex' is in a vibrant purple, uppercase, sans-serif font with a registered trademark symbol. The background is a dark, starry space with glowing, multi-colored fiber optic-like lines in shades of purple, blue, and green that curve across the lower half of the image.

Instant, Accurate Document Classification—Powered by AutoClassify AI

Identify and route every document with unmatched accuracy

Streamline operations, cut labor costs, and ensure every document lands in the right place the first time with **AutoClassify AI**. An AI-driven classification engine, this module instantly identifies document type, recognizes intent, and routes it into the correct workflow automatically.

Why Manual Classification Slows Everything Down

Manual sorting and rule-based legacy systems simply can't keep up with modern document complexity, especially when formats shift, layouts change, or volumes surge.

Here's where legacy processing falls short:

Manual Sorting Bottlenecks

Teams waste hours separating mixed batches before scanning or processing

Scaling Requires More People

New workflows, new document types, or new lines of business mean rewriting rules—or adding headcount

Downstream Errors Grow Costly

Misrouted documents create cascading problems—missed SLAs, compliance issues, rework, and customer friction

Rigid Rules Break Easily

Static templates and keyword triggers can't adapt to complex or evolving document types

Elevate Your Workflows with AI-Powered Classification

Say goodbye to tedious prep and heavy coding. AutoClassify AI delivers dynamic, high-accuracy classification for every document, structured or unstructured.

Classify every document instantly

Automatically send each document to its proper workflow—claims, remittance, onboarding, case files, medical records, and more

Detect boundaries automatically

Identify where each document begins and ends, even in mixed or unstructured image streams

Eliminate separator sheets

Reduce labor, prep time, and training as the system learns directly from your existing physical processes

Cut downstream errors

Prevent misroutes and rework with consistent, high-accuracy classification and separation

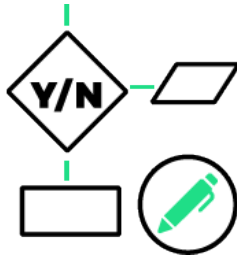

AI Classification You Can Control

Other AI platforms send your documents through public clouds or third-party pipelines. **ibml Coretex**[®] keeps every file, model, and decision securely inside your environment.

On-Prem Privacy

Nothing leaves your firewall. All classification happens inside your infrastructure or private cloud

Confidence Scoring

ibml Coretex evaluates the certainty of every classification, flagging any low-confidence results for review

Human-in-the-Loop

If a classification doesn't meet your threshold, it's routed to an employee for review

Transparent Audit Trails

Track which workflow each document entered, why it was classified that way, and who verified it—ideal for regulated industries

Scale Confidently with Flexible Subscriptions

Start quickly, expand effortlessly, and pay for only what you need.

- **Enjoy simple subscription pricing.** Pay just one bill that's aligned to your exact usage.
- **Get automatic access to upgrades.** Receive AI updates and access to new modules in real-time.
- **Expand easily.** Add modules or processing power as your operations grow, no large license fees or long deployment cycles required.

Review Classifications from Anywhere

Allow your teams to validate document types from any browser, with no VPN or client install required. Whether teams are remote or hybrid, **ibml Coretex** keeps your document streams accurate and compliant without sacrificing security or oversight.

Your Trusted Partner in Innovation

For decades, ibml has powered the world's most data-intensive organizations with high-accuracy capture and secure data processing. With **ibml Coretex AutoClassify AI**, we're delivering a new level of automation—smart, secure, explainable, and fully under your control.

Ready to protect your data at scale?

Begin your free demo today to experience secure AI you can trust.

Transform Your Classification with **ibml Coretex**[®]

Evolve beyond manual sorting and rigid systems with a flexible, intelligent decision engine that identifies and routes every document instantly.
